The sauna revolution continues

Leader:

It fits anywhere – now more than ever: KLAFS, the market leader in the sauna, pool and spa sector, is adding an exciting chapter to the success story of its space-saving S1 zoom sauna. The S1 is now also available as an “Extra Small” variation for particularly narrow installation situations.

Text:

Schwäbisch Hall, September 2017. Attractive living space is getting more and more expensive – and as a result the available living space is at a premium. This is where the S1 sauna by KLAFS has a great deal to offer: It is the first sauna in the world that can shrink in size – like a zoom lens – at the touch of a button.

The right product at the right time – the S1 is the sauna innovation of our time and has already won eight important awards, including the German Design Award, the iF Design Award and the Red Dot Design.

The S1 has also taken the hearts of sauna fans by storm. Real-life experience has shown, however, that sometimes even the smallest S1 version "Small" (172 cm wide) is too big for some installation sites.

That is why the S1 family is now expanding, in time for the start of the 2017/2018 sauna season: starting immediately, KLAFS is also offering the S1 in an "Extra Small" variation (142cm wide).

This means that the S1 is now available in four sizes (XS: 142 cm wide, S: 172 cm wide, M: 202 cm wide and L: 232 cm wide).

Aside from the narrow width, there is another feature that makes this new version the first choice for anyone who likes to keep things simple: just like the S variation, the XS variation is also designed for a 230 V power outlet. Just plug it into a normal outlet – and you can get into the sauna and relax right away.
