1. QUICK REFERENCE GUIDE - SANARIUM CONTROLLER

The KLAFS controller enables you to operate your Sauna S1 quickly and easily. There are numerous pre-programmed standard programs available for each bathing mode. Any changes made to the standard program settings are saved in a custom program (last setting). There is a custom program for each bathing mode.

Only operate the touchscreen with your fingers.

Operating the touchscreen with hard objects will leave scratches on the screen's surface or damage the screen.

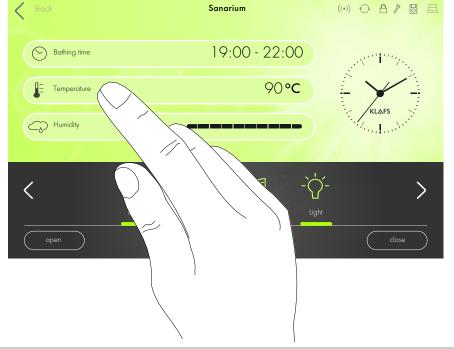

Entering and changing settings will be quicker if a short pause of around 0.5 seconds is left between presses.

After five minutes of non-use, the backlighting will gradually start to dim and eventually switch off fully. If you touch the display while it is dimmed or switched off, the backlighting will switch

on first. You will then be able to operate the controller via the display.

— 40 °C

90 °C

– 60 °C

2. BATHING MODE

All bathing modes in your KLAFS Sauna S1 have been designed to improve your general health and well-being.

However, you should still take into account any pre-existing health conditions when choosing your bathing program.

This includes:

•

90 °C

— 60 °C

- Temperature
 - Relative humidity (optional)
- Bathing time.

Choose your bathing program according to its length and your condition. You should end the session and leave the cabin if you start to feel unwell.

2.1. SAUNA

SAUNA

with temperatures of 80 - 90 °C and a low relative humidity.

Warm air bath

with a particularly mild climate, temperatures of 45-60 °C and a relative humidity of up to approx. 20%.

2.2. SANARIUM (optional)

Soft steam bath

as a mild and humid bath, with temperatures of 48-60 $^{\circ}\mathrm{C}$ and humidity adjustable in 10 increments.

Tropical bath

with temperatures of up to 75 °C and humidity adjustable in ten increments. The temperature and the absolute humidity are controlled by a microprocessor controller in both bathing modes.

Aroma bath

with the same climate settings as the soft steam bath, plus evaporation of premium-quality herbal extracts and scents. This enhances the effect of the soft steam bath.

— 60 °C

- 90 °C

3. TECHNICAL DATA

Controller model 21 S1 T: 3/N/PE 400 V - 50/60 Hz, max. 7.5 kW. Controller model 21 S1 T: 1/N/PE 230 V - 50/60 Hz, max. 3.3 kW. Room conditions: Temperature 0 °C to 25 °C, max. 80% relative humidity.

4. INTENDED USE

The controller is intended for use with the heaters tested and approved by the German VDE (Association for Electrical, Electronic and Information Technologies) or TÜV (Technical Inspection Authority):

• Sauna heater with or without evaporator

The controller is only to be used as intended. Intended use also assumes adherence to the manufacturer's operating, installation and servicing instructions. The manufacturer is not responsible for any damage resulting from unintended use or unapproved changes to the controller. The user does these things at their own risk.

The controller may only be operated, maintained and repaired by persons who are familiar with it and aware of the risks involved. Always observe the relevant German VDE regulations and other generally recognised safety precautions.

5. GENERAL SAFETY PRECAUTIONS

Read and observe the operating instructions and safety precautions before commissioning.

- Disconnect the controller from the mains before opening the controller housing.
- The controller may only be connected to the mains by a locally authorised electrician.
- Connect sauna units to the mains supply by inserting a safety plug into a safety socket. In the connecting feed line, use a residual-current circuit breaker $I_{\Delta N} \leq 0.03$ A with a contact gap of at least 3 mm.
- Only connect sauna units with a fixed connection directly to the mains via a fixed connection in accordance with VDE (German Association for Electrical, Electronic and Information Technologies) regulations. In the connecting feed line, use a residual-current circuit breaker $I_{\Delta N} \leq 0.03$ A with a contact gap of at least 3 mm. To minimise electrical hazards, if the unit's mains power cable becomes damaged it must be replaced by the manufacturer, by the manufacturer's customer service department, or by another suitably qualified individual.
- Please contact KLAFS customer service in case of a fault.

- 40 °C

- 60 °C

90 °C

- Remote operation (remote power-on unit): Setting, controlling and/or adjusting the controller using a command or a remote control unit that is outside the range of vision of the sauna heater.
- Only use original KLAFS spare parts.
- Unapproved changes to the controller are not permitted.
- Install the controller in accordance with the installation instructions.
- Electrical wiring installed at a height of more than one metre inside the cabin and in cabin walls must have silicone insulation.
- Before commissioning the controller, always make sure that there are no flammable objects near the sauna heater or infrared heater in the cabin. RISK OF FIRE
 - Do not use the sauna to dry your washing.
 - Never use undiluted essential oils. Only use the indicated concentration (approx. 20 30 drops of oil in one litre of water).
 - Only use KLAFS essential oil extracts.
 - Never store the bottle containing the essential oil inside the sauna cabin.
 - Regularly check the sauna heater for damage.
 - Never pour herbal extracts, used in SANARIUM mode, directly into the evaporator. Outside of the cabin, fill the aroma cup a quarter full with water and add the herbal extracts drop by drop in accordance with the instructions on the bottle. Then re-attach the aroma cup to the steam outlet.
 - Check the heater for flammable objects before restarting the timer or switching on the heater via a separate remote activation system.
 - The unit can be used by people with reduced physical, sensory or mental capabilities and by people who lack experience/knowledge in using it provided that they are supervised while doing so and/or have been shown how to use the unit safely and understand the potential risks involved. Children must only use the unit under supervision. Children should not clean the unit or carry out basic maintenance on it without supervision.

7. BASIC FUNCTIONS AND SETTINGS

7.1. Switching the power supply on/off at the main switch

Switching the power supply on

1. Press the touch key (1).

The controller goes into standby mode. In standby mode, the display shows the bathing mode that was last selected.

When the controller is switched on, the following symbols are displayed: Settings for the relevant bathing mode, clock, Start/Stop extras and cabin control (optional).

For standby, see page 27.

After five minutes of non-use, the backlighting will gradually start to dim and the screen will switch off fully within a minute.

If you touch the display while it is dimmed or switched off, the backlighting will switch on first. You will then be able to operate the controller via the display.

7.14. Varius S - Commissioning the evaporator

Risk of fire Do not fill the aroma cup on the heater.

Hot surfaces - Risk of scalding!

The cover (1) will be hot straight after a bathing session has finished. Protect your hands and fingers from burns.

- 1. Use the aroma fork (2) to remove the aroma cup (4).
- Pour diluted scent into the aroma cup (4) at a distance from the sauna heater.
- 3. Put the aroma cup (4) back in.

7.15. Varius S - Decommissioning the evaporator

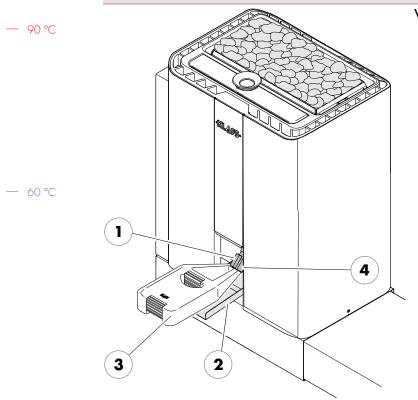

Drain the water after every bathing session.

Danger of scalding

The residual water will be hot straight after a session has finished. Protect your hands and fingers from scalding.

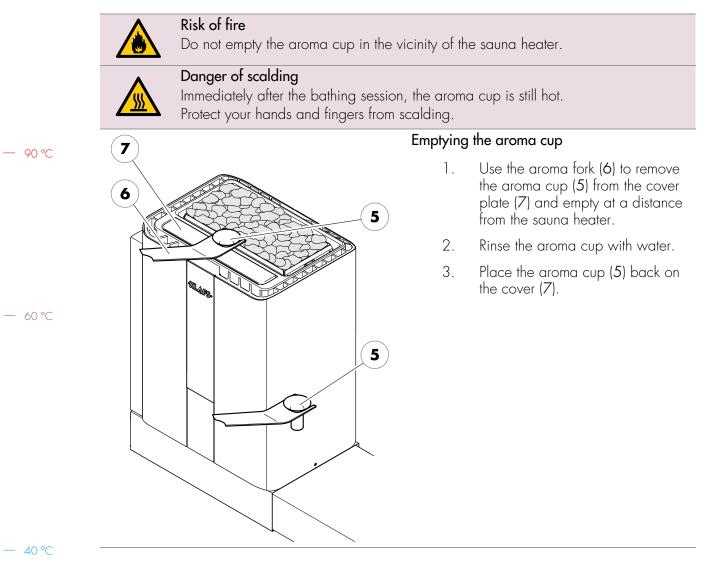

Varius S - Draining the residual water

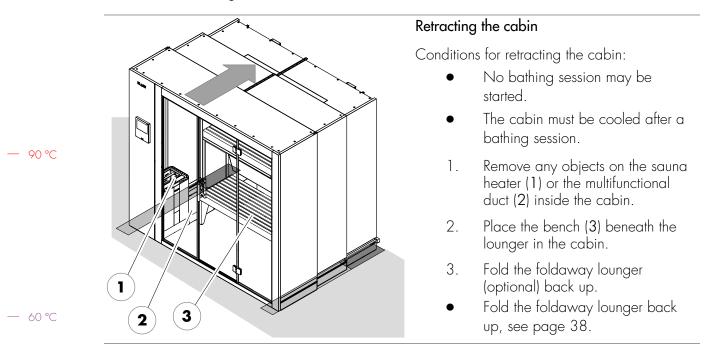

- 1. Press down on the cover flap (1) at the bottom (2) and then pull it out.
- 2. Hold the filler can (3) below the drain valve (4).
- 3. Open the drain valve (4).
- 4. Close the drain valve (4) again after draining the evaporator.
- 5. Close the protective cover (1) again.
- 6. Drain the filler can (3).

7.15. Varius S - Decommissioning the evaporator

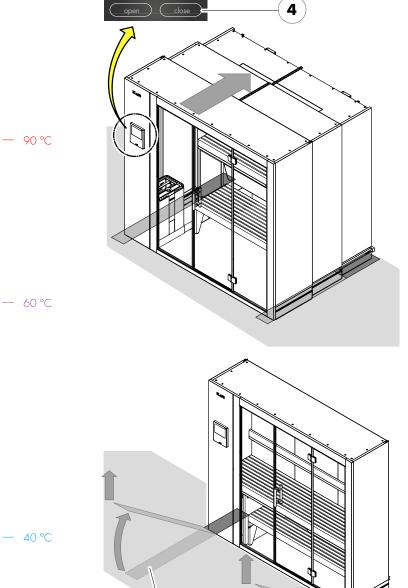

7.16. Retracting the cabin

5

7.16. Retracting the cabin

Risk of injury and material damage

Before retracting the cabin, ensure that no persons or objects are inside the cabin or in the path of the cabin.

The cabin door must be closed in order to extend or retract the cabin.

Requirement: The main switch on the cabin must be switched on, see page 21.

4. Retract the cabin. Press and hold the touch key (4) until the cabin is fully retracted.

Put away the floor protectors (optional)

- Floor protectors are required for the cabin if it is installed on flooring such as carpet.
- 5. Take the floor protectors (5) off the floor and store them elsewhere, e.g. inside the cabin.

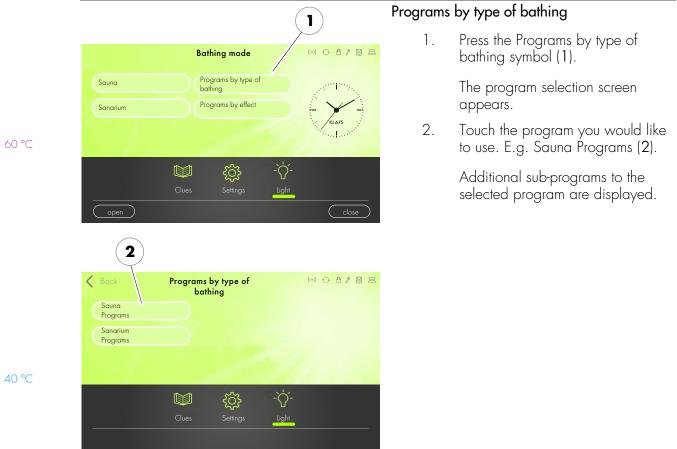

8. CUSTOM SETTINGS

Programs by type of bathing 8.1.

Each bathing mode offers the last bathing program you used (with your custom settings) and special programs with preset bathing parameter settings that cannot be changed.

Any changes made to bathing parameters are saved automatically. If the personalised bathing parameter settings are the same as the settings in one of the standard programs, the standard program is automatically selected.

_

Programs by effect 8.2.

Each bathing mode offers the last bathing program you used (with your custom settings) and special programs with preset bathing parameter settings that cannot be changed.

Any changes made to bathing parameters are saved automatically. If the personalised bathing parameter settings are the same as the settings in one of the standard programs, the standard program is automatically selected.

Programs by effect

1. Press the Programs by effect symbol (1).

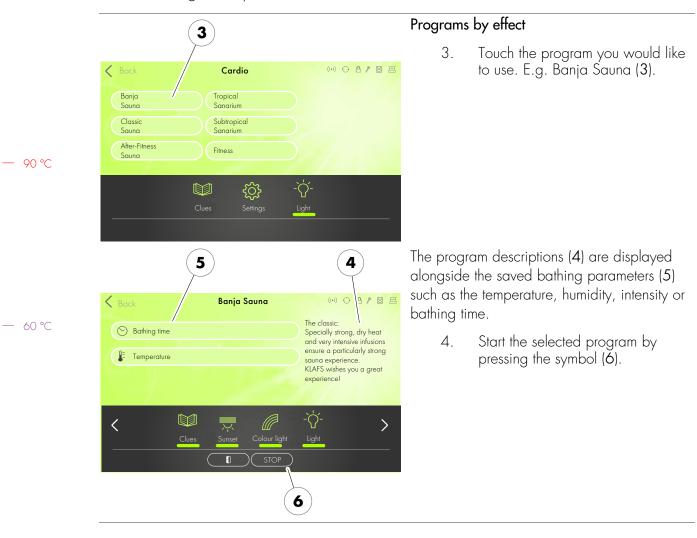

> The program selection screen appears.

2. Touch the program you would like to use. E.g. Cardio (2).

> Additional sub-programs to the selected program are displayed.

40 °C

8.2. Programs by effect

8.3. Setting the bathing time

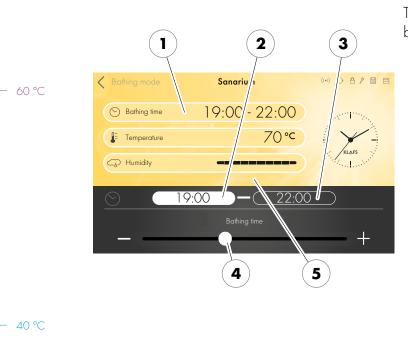

Risk of fire Before commissioning the controller, always check that there are no inflammable objects on or near the sauna heater.

If the slider is at the far left, the selected bathing mode will start immediately.

90 ℃

In preset time mode (start time in the future), the length of the last heat-up phase is subtracted.

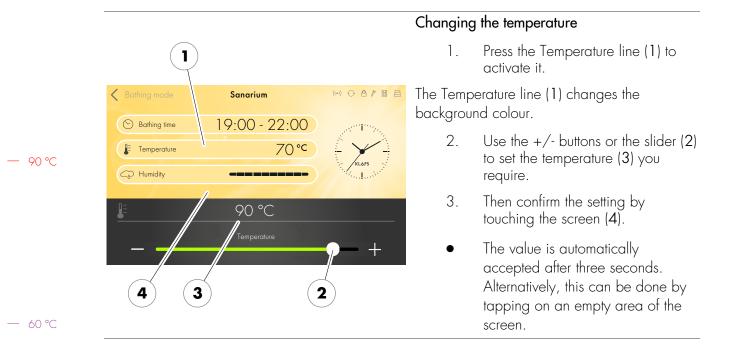

Bathing time

1. Press the Bathing time line (1) to activate it.

The Bathing time line (1) changes the background colour.

- Select "Start time" (2) and use the +/- buttons or the slider (4) to set the start time.
- Select "End time" (3) and use the +/- buttons or the slider (4) to set the end time.
- Slider at the far right = maximum Bathing time; slider at the far left = Bathing time of one minute.
- 4. Confirm the setting by touching the screen (5).
- The value is automatically accepted after three seconds. Alternatively, this can be done by tapping on an empty area of the screen.

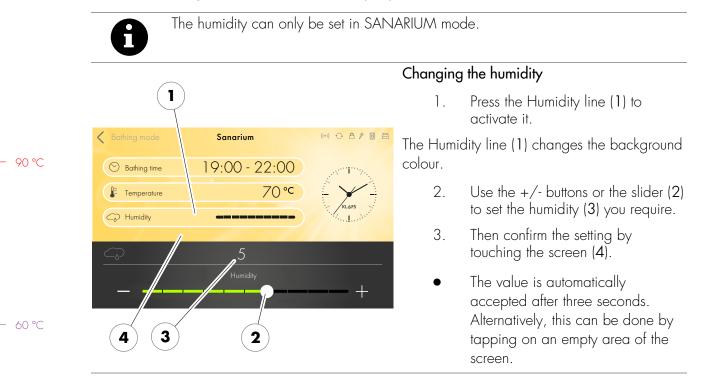

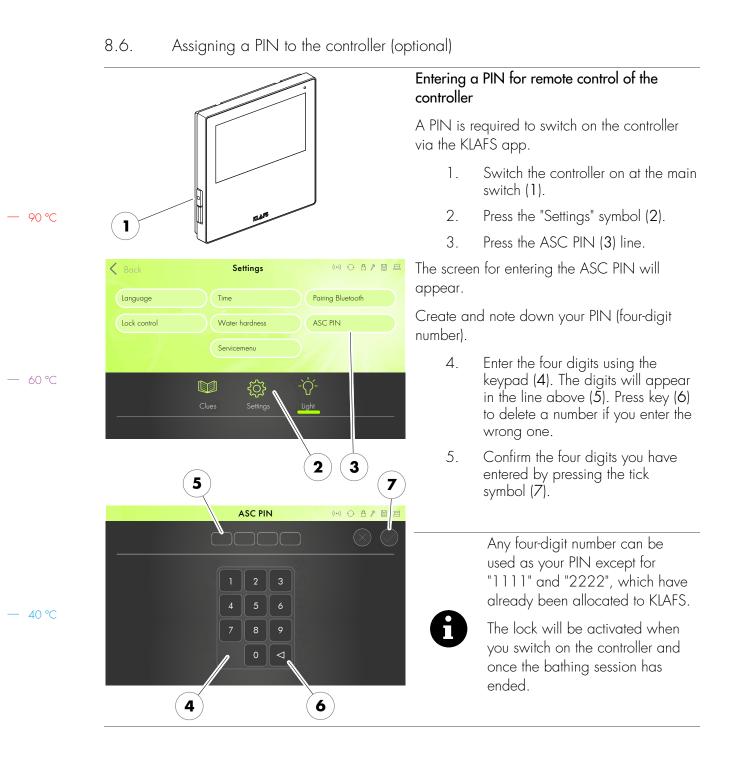

8.4. Setting the temperature

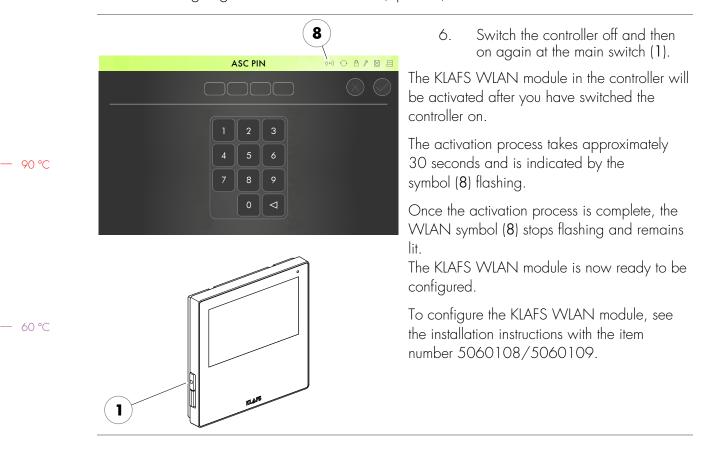

8.5. Setting the SANARIUM humidity (optional)

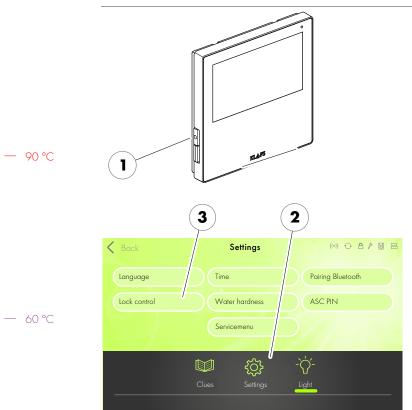

8.6. Assigning a PIN to the controller (optional)

8.7. Enabling/disabling "blockade control unit" (locking/unlocking the keypad)

Calling up the "blockade control unit" menu

When enabled, the "blockade control unit" function prevents the controller from being operated unintentionally.

- 1. Switch the controller on at the main switch (1).
- 2. Press the "Settings" symbol (2).
- Press the "Blockade control unit" line (3).

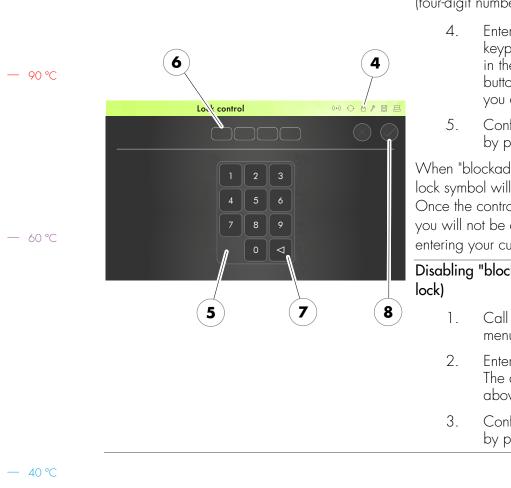

Any four-digit number can be used as your PIN except for "11111" and "2222", which have already been allocated to KLAFS.

− 40 °C

8.7. Enabling/disabling "blockade control unit" (locking/unlocking the keypad)

Enabling "blockade control unit" (keypad lock)

Create and note down a custom security code (four-digit number).

- Enter the four digits using the keypad (5). The digits will appear in the line above (6). Press button (7) to delete a number if you enter the wrong one.
- 5. Confirm the four digits you entered by pressing the tick symbol (8).

When "blockade control unit" is enabled, the lock symbol will appear (4).

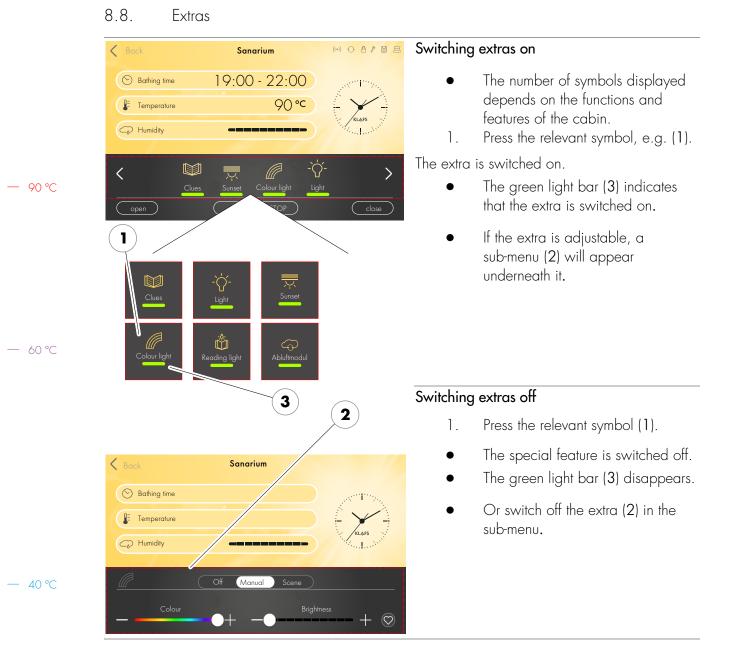

Once the controller has switched to standby, you will not be able to operate it without entering your custom security code first.

Disabling "blockade control unit" (keypad lock)

- Call up the "blockade control unit" menu.
- Enter "11111" using the keypad (5). The digits will appear in the line above (6).
- 3. Confirm the four digits you entered by pressing the tick symbol (8).

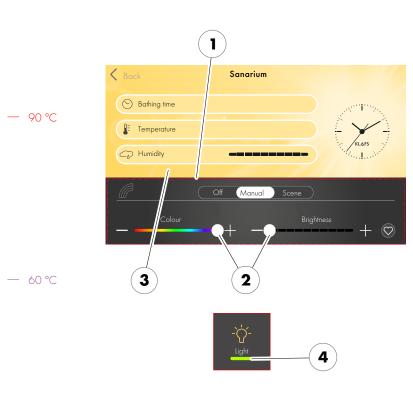

Page 55 / 68

8.8. Extras

Switching on and configuring adjustable extras

- You can change the settings of adjustable extras (1) using the +/buttons or the slider (2).
- Setting the adjustable extras (1) to O switches them off.
- 2. Apply the change by touching the screen (3).
- The green light bar (4) appears.

The adjustable extra (1) then starts with the setting entered.

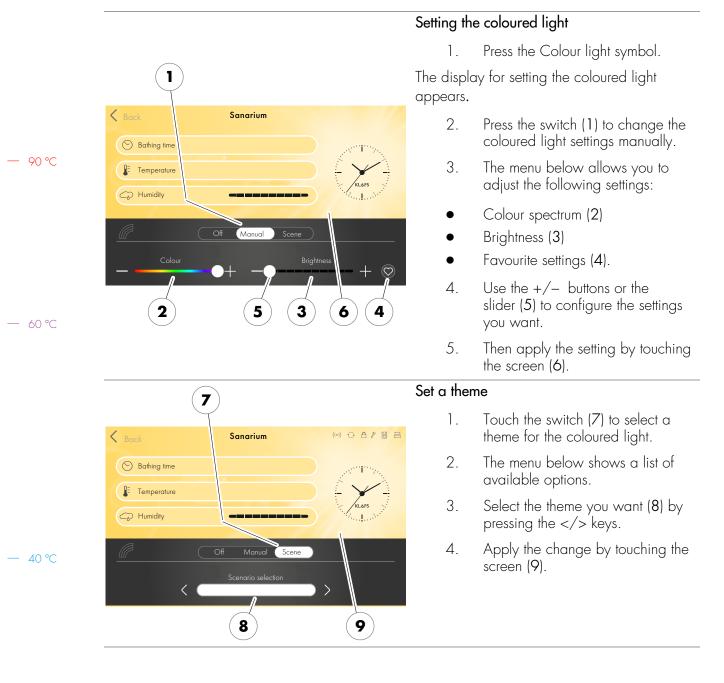

Switching adjustable extras off

- Change the settings of adjustable extras (1) to 0 using the +/buttons or the slider (2).
- 2. Apply the change by touching the screen (3).

The adjustable extra (1) is switched off.

• The green light bar (4) disappears.

8.9. Extras: Coloured light

9. IF SOMETHING DOES NOT WORK

9.1. Error messages on the display

Risk of injury and damage to property

Repairs and maintenance must only be carried out by KLAFS service engineers or by technicians expressly authorised by KLAFS. customerservice@klafs.de. KLAFS can only provide repairs and servicing work under warranty if this work is carried out by KLAFS service engineers.

error message (**) 🗘 🗛 🖉
Safety check (72)
switched off for your safety. Please check, whether your om objects and the door is closed.

Error messages

The Service symbol (1) appears together with the error message number (2) (e.g. 72).

The controller may still be operational while the Service symbol is flashing, depending on the nature of the fault.

9.3. Rectifying faults, resetting error messages

Notice: Only allow work on electrical components/assemblies to be carried out by qualified electricians who work in accordance with electrical rules and regulations. Switch the controller off, disconnect it from the mains and make sure that it cannot be switched on again.

- 1. Switch the controller off at the main switch (1).
- 2. Disconnect the controller from the mains and make sure that it cannot be switched on again.
- 3. Rectify the fault.
- 4. Reconnect the controller to the mains.
- 5. Switch the controller on at the main switch (1).

— 40 °C

90 ℃

— 60 °C

10. CLEANING AND MAINTENANCE

10.1. Cleaning the sauna cabin

The high humidity in SANARIUM mode does not damage the wood of your cabin. A prerequisite is that the cabin is well ventilated after use and the drying phase is completed.

Never use a hose or pressure washer on the inner cabin walls, benches or seats.

90 °C

Dirty loungers

Wipe the wooden surfaces with a damp cloth.

Sand any rough surfaces on the loungers with fine sandpaper if necessary.

The benches can also be rinsed with a 3% hydrogen peroxide solution (available from specialist dealers).

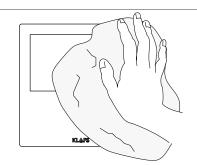

Disinfectants are highly corrosive.

It is therefore important to observe to the relevant safety precautions. Always wear rubber gloves.

The outer cabin walls have been varnished or waterproofed. Do not varnish, paint or waterproof the inner panelling or the inner cabin walls and units (loungers, etc.).

10.2. Cleaning the touchscreen

Switch the controller off at the main switch before cleaning.

The touchscreen's surface should only be cleaned using a soft cloth. Moisten the soft cloth with water. For more stubborn marks, soak the soft cloth in an organic solvent such as light petroleum.

Do not use corrosive solvents such as isopropyl alcohol (IPA).

— 60 °C

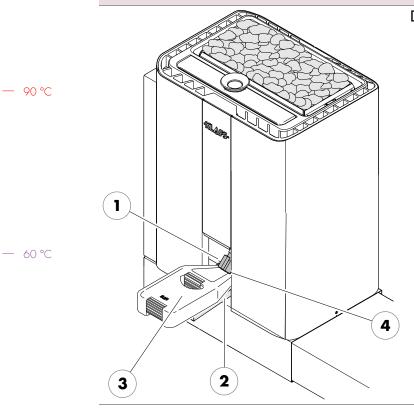

40 °C

10.3. Varius S - Decalcifying the evaporator

Risk of chemical burns!

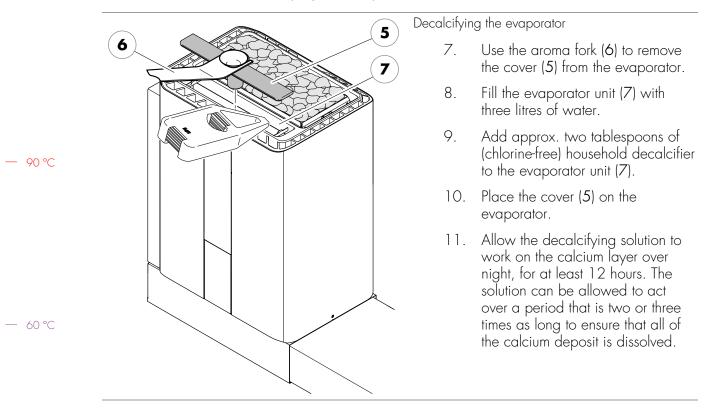

There is a risk of chemical burns to eyes and skin when handling decalcifiers. Always follow the instructions on the package insert.

Draining the evaporator

- 1. Press down on the cover flap (1) at the bottom (2) and then pull it out.
- 2. Hold the filler can (3) below the drain valve (4).
- 3. Open the drain valve (4).
- 4. Close the drain valve (4) again after draining the evaporator.
- 5. Close the protective cover (1) again.
- 6. Drain the filler can (3).

10.3. Varius S - Decalcifying the evaporator
